

Embouchure Formation and Placement

Embouchure Formation

Step 1.

Say the word *dim* in order to form your basic embouchure shape, your lips should be relaxed and in a neutral position.

Step 2.

Tighten your lip corners slightly in order to slightly **flatten** your lips and keep your lips firm.

Step 3.

Blow air through the middle of your lips by saying the letter *p*, it might help to think of the word *pooh*. Make sure that your lips are **firm** but not tense.

Embouchure Placement

Step 1.

Take the head joint and **find** the embouchure hole and **form** your *dim* embouchure.

Step 2.

Place the embouchure hole right in the **middle of your lips** and **rotate** it so that the lower edge of the embouchure hole is **touching the lower edge of your bottom lip**.

You should feel the edge of the embouchure hole right between your lower lip and your skin.
